EDUCATION

Computer Science and Engineering   **2019-2023**
Siksha 'O' Anusandhan University, India   *CGPA: 8.1/10*

EXPERIENCE

Software Engineer / Fullstack Developer   *July 2023 – Present*
Reliance Jio

- Implemented React feature to optimize user engagement, resulting in enhanced client interaction and satisfaction.
- Developed clean, reusable business UI components in React.js following industry best practices for performance.
- Built error-free APIs and microservices with Node.js and Express.js, prioritizing modularity and scalability.
- Optimized MySQL queries and procedures for improved performance, reduced load times, enhanced user experience.

Frontend Developer   *May 2021 – June 2021*
IC2C (Intern)

- Collaborated with clients to gather requirements and translate them into detailed functional specifications.
- Developed responsive web applications using React.js and Redux to ensure an optimal user experience.
- Conducted comprehensive testing and debugging processes to ensure timely delivery of bug-free applications.

PROJECTS

Sir H. N. Reliance Foundation Hospital   *July 2021 – Present*
React.js, Node.js, Express.Js MySql, Kafka, Redux, Sequelize, Elasticsearch

- Improved workflow efficiency and patient care by implementing surgery scheduling and material ordering processes.
- Enhanced system security with JWT-based authentication and role-based access for efficient user management.
- Improved data management efficiency with a server-side UI featuring filtering for enhanced system accessibility.
- Developed a high-performance single-page web app to optimize user experience and operational efficiency.

Tira   *Jan 2024 – Feb 2024*
React.js, Node.js, Express.js, MySql

- Created automated workflows to streamline wishlist management systems, enhancing efficiency and user experience.
- Developed API for easy item selection and sharing on messaging platforms, enhancing user engagement
- Developed a dynamic API for item selection and sharing on WhatsApp, significantly enhancing user engagement.

AnyTrac   *Feb 2024*
Node.js, Express.js, MySql

- Developed API for efficient app data storage, enhancing tracking and analysis, simplifying production error logs.
- Create API to display log data on portal for streamlined monitoring and analysis.
- Developed OTP messaging features, enhancing user security and experience through dynamic message-oriented middleware.

TODO Web Application
Node.js, Express.js, MySql

- Developed a user-friendly React ToDo web app, optimizing task management and productivity.
- Implemented dynamic task management features in a responsive React web app, enhancing user engagement.
- Created a ToDo web app using React, MUI, and Node.js for efficient task management and user experience.

SKILLS

- **Programming:** C++, JavaScript, MySQL, Oracle, MongoDb
- **OS**: Windows, Linux, Ubuntu, MacOS
- **Libraries and Frameworks:** Node.Js, Express.Js, React.Js, Sequelize, Kafka, Redis
- **Development Tools::** Git, JetBrain, VS Code, Workbench, HeididSql, Postman

CERTIFICATION

React - The Complete Guide (incl.React Router & Redux) | NodeJS - The Complete Guide (MVC, REST APIs)
